

Sacred Heart Central School

Faith & Knowledge

25 July 2017

Dear Parents,

This year Sacred Heart will continue hosting a Primary **Science Fair** on Thursday **10th August** at St Columba's Hall between 2:15pm to 3pm.

The theme for the Sacred Heart Science Fair this year is **Future Earth**.

This is an excellent opportunity for students to showcase their interests in scientific investigations. If your child needs examples or ideas for the Science Fair, please contact Mr Winsor.

The students may choose to work in small groups or individually. This program is optional and has been designed to allow students to apply their classroom investigation skills in the home environment, and further extend areas of interest for students.

If your child/ren would like to participate during the 2017 Sacred Heart Science Fair, please return the slip below and the name of the scientific investigation. All students will need to complete the research sheet and bring all materials to school on Thursday **10th August**. Parents and grandparents are also invited to share in this wonderful learning experience.

If you have any questions, please contact the Front Office on 69422612.

Kind regards,

Brad Winsor
Primary Coordinator

Mrs Janet Cartwright
Principal

2017 Science Fair

My Child/ren _____ **would** be interested in participating in the Sacred Heart Science Fair on **Thursday 10 August**.

Investigation: _____

Signed: _____ *Parent/Guardian*
